Will the Minister for Communications be pleased to state:

- (a) *whether it is a fact that Shorkot Interchange on Faisalabad-Multan Motorway (M-4) has not been made functional since opening of M-4 in September, 2019 and all the commuters are forced to get off the interchange causing inconvenience to them, if so, the reasons thereof indicating also the persons responsible for the same; and*
- (b) *whether it is also a fact that due to non-operationalization of the said interchange a number of accidents has taken place there so far, if so, the details thereof?*

Mr. Murad Saeed: (a) Shorkot interchange is operational since 2nd February 2019. However the vehicles have to exit at Shorkot Interchange due to Segregation of Toll.

Toll on M-4 is collected in two sections separately *i.e.* from Pindi Bhattian to Shorkot and from Shorkot to Multan through two different operators, therefore, the toll revenue at Shorkot Interchange/Toll Plaza needs to be segregated.

To resolve this issue NHA has floated a single tender for entire M-4 Section from Faisalabad to Shortkot-Khanewal-Multan (297 Kms) and the same is in the finalization stage. After award to successful bidder the issue will be resolved and vehicles would not have to exit at Shorkot Interchange/ Toll plaza.

(b) As explained earlier, the said interchange is operational, however, traffic is being diverted into loop but not a single accident occurred due to diversion at Shorkot Interchange.
