4. The GM, SNGPL (Peshawar), informed the Committee that they are providing 11.2 MMCFD gas against the demand of 9.8 MMCFD to District Charsada. However, there are problems of low gas pressure in some areas with particular reference in Tangi area. The reason for this is that the point of Tangi is overloaded and is also situated at the tail end. To overcome this problem, an operational phase of 6" dia x 1.6 Kms from Mera Umerzai Chowk to Main Bazar, Umarzai alongwith 4" dia TBS has been approved for the Network augmentation and optimization for addressing the problems being faced by tail end areas. Regarding the overloading of Tangi point, he informed that they have made a plan to shift some of the load to Umarzai point which will resolve the issue.

6. Senator Behramand Khan Tangi appreciated the work being done by the SNGPL in Charsada and informed that the problem has largely been resolved at present. He, however, urged the SNGPL to continue their work so that the problem may not reoccur during the winter season. The Committee directed that the SNGPL should take necessary steps to maintain the gas pressure during the winter season in District Charsada and thus disposed off the matter.

7. **Recommendation:** The Committee directed that the SNGPL should take necessary steps to maintain the gas pressure in District Charsada during the winter season.
