STATEMENT OF OBJECTS AND REASONS

It has been observed in the recent past that the persons driving motor cars especially public transport are found under the influence of alcohol or drugs which seriously affects motor skills such as eye, hand and foot coordination. Without crucial coordination skills, a person may be unable to avoid an impending harmful situation. Therefore, it is proposed to increase the penalty and also make the conviction transparent by determining the offence subject to an examination of a medical practitioner.

2. The bill seeks to achieve the above said purposes.
