Realizing that universities and colleges are the nurseries for preparing committed, productive and good human beings who eventually contribute towards attaining healthy, progressive and moral social order in a society;

Reiterating that an individual harnessed with the divine knowledge of the Holy Quran and Sunnah can play a pivotal role in the progress and development of Pakistan in its true sense;

Appreciating the initiative in the Province of Punjab where education of the Holy Quran with translation has been made mandatory in all public sector universities purely for knowledge and learning purposes;

Recommends that teaching of Holy Quran with translation, tajweed and tafseer should be made compulsory in all universities of Pakistan for students of all disciplines, without making it part of examinations or provision of additional marks so that focus should remain on acquisition of learning and knowledge of Holy Quran."

60. SENATOR MUSHTAQ AHMED, to move the following resolution:-

" The House acknowledges the significance attached to the study of the life of the Holy Prophet Muhammad (SAW) for individual and collective development surrounding all aspects of human life. Without the in depth study and understanding of the Seerat of the Holy Prophet Muhammad (SAW) the new generation cannot comprehend the modern days' challenges and progress in their individual and collective life.

The House is cognizant of the fact that there is no specialized and detailed study of the life of the Holy Prophet Muhammad (SAW) at various tiers in our education system.

In order to inculcate detailed and comprehensive knowledge of the Seerat of the Holy Prophet Muhammad (SAW) in the minds of the younger generations, the House recommends that the Federal Government may immediately take the following steps:

(i) Seerat of the Holy Prophet Muhammad (SAW) be introduced as a special subject and compulsory at primary, middle, secondary and higher school levels in Islamabad;

(ii) Refreshing study of the Seerat of the Holy Prophet Muhammad (SAW) be made as a special subject as part of all disciplines at university level in Islamabad Capital Territory;

"Concerned at the problems being faced by hundreds of thousands of commuters of Islamabad, Rawalpindi, Lahore, Multan and Karachi including patients, students and office goers due to road blockages for security of visiting foreign cricket teams;

Cognizant of huge monetary expenditures and assignment of thousands of security personnel on these security arrangements on one hand and wastage of millions of rupees worth fuel of commuters on the roads during road blockages on the other hand;

In view of economic losses, wastage of time, ensuing mental stress of general public, accidents by traffic jams and resultant noise and air pollution in these cities;

Appalled by closure of educational institutions, health centres, offices and businesses along the routes designated for movement of teams and officials;

The House recommends that the Government and Pakistan Cricket Board should build international standard hotels within the complex of stadiums in all these cities with walking approach to the stadium for players and team officials. The hotels so built will not only be useful for international cricket but also PSL and important domestic matches. They will also be cost effective by saving millions of rupees of recurring expenditure from national exchequer on account of security and movement of players and team officials. The step will also further improve the security of visiting teams and prove beneficial for promotion of cricket in the country in the long run."

Reiterating that the education revolution and other sustainable goals can be achieved through establishment of state of the art HEIs, ground-breaking research and innovation, and academia-facilitated industrial complexes for translating theory into practice;

Recommends that, the Federal Government should launch a program for establishment of mega educational cities in each province;

Every mega educational city should encompass a total area of about 2500 acres and comprise often universities of 250 acres each offering advanced education in distinct fields including skills and technology; and

The land for these educational cities should be provided by respective provincial governments whereas the infrastructure of the ten universities in each province should be built by the Federal Government;
