RESOLUTIONS

- 32. SENATOR DR. ZARQA SUHARWARDY TAIMUR**, to move the following resolution:-

“Resolution on Protection of Rooftop Solar Prosumers and Alignment of NEPRA's Draft "Prosumer Regulations, 2025" with National Policy. This House, Recognizing that Pakistan's energy security, economic stability, and climate obligations require accelerated deployment of indigenous and renewable energy, including distributed generation by households and small enterprises;

Recalling that the Alternative & Renewable Energy Policy, 2019, the National Electricity Policy, and Pakistan's Nationally Determined Contributions envisage a growing role for citizen participation in clean energy;

Noting with grave concern that the draft NEPRA (Prosumer) Regulations, 2025:

Permit retrospective alteration of existing net-metering licenses;

Reduce rooftop export compensation by approximately 70% without transparent, evidence-based valuation;

Render small-scale solar economically unviable; and

Concentrate discretionary powers in licensees without adequate safeguards;

Further noting that rooftop prosumers export approximately 80 MW out of 45,000 MW of national capacity—less than 0.002%—and are not responsible for capacity payments, which arise primarily from long-term IPP contracts; affirms that:

Retrospective regulatory change undermines legal certainty and investor confidence;

Citizen investment in clean energy is a public good and must be protected; Distributed renewable energy must be integrated, not penalized, within Pakistan's power system;

Resolves that the Government of Pakistan shall:

Direct NEPRA to withdraw the draft regulations in their present form; Incorporate an explicit non-retroactivity clause protecting existing and pending licenses for their full term;

Ensure any transition includes a minimum 24-month grace period;

Require a published, independent Value-of-Solar study before finalizing export tariffs; and

Align the regulatory framework with national energy and climate policy.

This House calls upon the Government to ensure that Pakistan's energy transition remains equitable, evidence-based, and citizen inclusive."

33. SENATOR SAMINA MUMTAZ ZEHRI, to move the following resolution:-

"Cognizant of the fact that the widespread deprivation of women from their lawful Islamic and constitutional inheritance rights is primarily caused by lack of public awareness and entrenched customary practices, particularly in rural and remote areas, despite clear guarantees under Sharia, the Constitution of Pakistan, and recent legislative reforms;

This House, therefore calls upon the Government, especially the Ministry of Religious Affairs and Interfaith Harmony, in coordination with the Ministry of Law and Justice and provincial authorities, to immediately launch a nationwide awareness and education campaign through mosques, religious institutions, media, and community outreach programmes to inform citizens of women's fixed inheritance shares and the legal consequences of denying such rights."

34. SENATOR MOHAMMAD ABDUL QADIR, to move the following resolution:-

Whereas, access to affordable, reliable, and environmentally sustainable electricity is essential for the economic development of Pakistan and the welfare of its citizens; and

Whereas, the Net Metering Policy introduced in 2017 enabled citizens to invest in renewable energy, reduced pressure on the national grid during periods of electricity shortage, and promoted clean and climate-friendly power generation; and

Whereas, despite a surplus of electricity generation capacity, electricity tariffs have increased sharply, disproportionately affecting low-income and vulnerable segments of society; and

Whereas, the national exchequer is burdened with approximately Rs. 2.2 trillion annually in capacity charges paid to Independent Power Producers (IPPs), which has become financially unsustainable and continues to inflate electricity tariffs for consumers; and

Whereas, achieving self-sustainability in the power sector through structural reforms, transparency, and optimal utilization of indigenous and renewable energy resources is the only viable long-term solution to overcome the burden of excessive capacity payments; and

Whereas, the Economic Coordination Committee (ECC), on 17th March, 2025, approved revisions to the solar net-metering policy, reducing the buyback rate from Rs. 27 per unit to Rs. 10 per unit, raising serious concerns regarding its potential negative impact on renewable energy adoption and public confidence; and

Whereas, Article 38 of the Constitution of the Islamic Republic of Pakistan obligates the State to ensure social and economic wellbeing, equitable access to basic necessities, and protection of weaker sections of society;

Now, therefore, this House resolves that the Government shall:

1. Ensure the continuation of net-metering facilities under a fair, transparent, and investor-friendly framework, allowing new applicants to avail net-metering without undue restrictions or discriminatory terms;
2. Review, reconsider, and rationalize the revised solar net metering rates approved on 17th March, 2025, to ensure that they do not discourage renewable energy investment, undermine energy affordability, or impede Pakistan's transition toward sustainable and clean power generation;
3. Mandate an independent forensic audit of all Independent Power Producers (IPPs) by the top three internationally recognized forensic audit firms, with the objective of ensuring transparency, accountability, and verification of their feasibility since inception of the project, verification of power purchase agreements, capacity charges, and all related financial obligations;
4. Initiate urgent structural reforms aimed at achieving self sustainability in the power sector, including renegotiation of unjustified capacity payments, optimization of the energy mix, reduction of reliance on imported fuels, and prioritization of indigenous and renewable energy sources;
5. Recognize solar energy, including grid-connected, off-grid, and battery based systems, as a strategic source of affordable and environmentally sustainable electricity, and accordingly rationalize taxes, duties, and levies on solar panels, inverters, and energy storage systems;
6. Promote local manufacturing of solar panels and energy storage technologies, including advanced battery systems, to reduce import dependence, create employment opportunities, and strengthen national energy security;
7. Formulate and implement comprehensive policies for the safe disposal, recycling, and environmental management of end-of-life solar panels and batteries, in accordance with international best practices; and
8. Place periodic progress reports before the Senate on the implementation of this Resolution to ensure transparency and accountability."

M O T I O N S
[Under Rule 218]

35. SENATOR SAMINA MUMTAZ ZEHRI, to move that this House may discuss the issue of the failure of investigation and prosecution authorities to causing acquittals in serious criminal cases such as rapes, murder, drugs on technical grounds and undermining public confidence in justice.

36. SENATOR DR. ZARQA SUHARWARDY TAIMUR, to move that this House may discuss the implications of draft `NEPRA (Prosumer) Regulations, 2025, which propose retrospective alteration of existing net-metering licenses.

AMENDMENTS TO THE SENATE RULES
(Under Rule 278)

37. SENATOR SHAHADAT AWAN, to seek leave under sub-rule (4) of Rule 278 of the Rules of Procedure and Conduct of Business in the Senate, 2012, to move that for Rule 47 of the said Rules, the following shall be substituted, namely:-

“47.
